Imal Zaya Harahap

Senior Full-Stack Software Engineer | Product Architect
North Jakarta, Jakarta, Indonesia · imalzaya19@gmail.com · +62 815-3461-1922 linkedin.com/in/imalzy

Summary

Senior Full-Stack Engineer with 5+ years designing and shipping production systems across **fintech and banking**. I own architecture decisions end-to-end — from component design and API boundaries to data modeling and system tradeoffs — using **React, Next.js, Angular, TypeScript, Node.js, and NestJS**. Track record of taking ambiguous product requirements and turning them into maintainable, scalable systems used by real banking and fintech customers at volume. Comfortable operating as a technical lead on remote/distributed teams.

Skills

Languages/Frameworks: TypeScript, JavaScript, React.js, Next.js (App Router), React Native, Angular, Node.js, NestJS **Architecture & Patterns:** Microfrontend Architecture, Component-Driven Design, RESTful API Design, Type-Safe Development **Data & Infra:** Supabase, Firebase (Realtime), REST APIs **Styling/UI:** Tailwind CSS, Figma-to-Code, Responsive & Accessible UI **Practices:** Agile/Scrum, Code Review, A/B Testing, Git, Cross-Functional Collaboration **Domain Expertise:** Fintech, Banking, KYC/Digital Onboarding, Bookkeeping/Ledger Systems

Experience

Fullstack Developer — Freelance / Contract

Jan 2019 – Present
Selected recent engagements delivering full-stack systems for early-stage and mid-size product teams:

- **weddingMarket** (Apr 2026 – Aug 2026) — Frontend Developer: Built a wedding marketplace platform from scratch using **Next.js** (web) and **React Native** (mobile), architecting the frontend structure, component library, and API integration layer as the sole frontend engineer on the project. Onboarded 572 vendors within the build/launch window.
- **LedgerOne** (Dec 2025 – Jan 2026) — Fullstack Developer: Architected a double-entry bookkeeping application, designing the schema and API layer in NestJS/TypeScript to guarantee ledger integrity and auditability.
- **Offline Apps – Event Management Platform** (Jun 2024 – Jul 2024) — Fullstack Developer: Built end-to-end event management platform (frontend + backend), covering event creation, registration, and attendee workflows.
- **MinerbaOne** (2024) — Frontend Developer: Delivered core frontend features in React/Next.js, leveraging AI-assisted development tools to accelerate implementation and shorten iteration cycles on UI components.
- **Medly AI** (2024) — Backend Developer: Built Node.js backend services powering a Telegram bot, handling command routing, message processing, and third-party API integrations, leveraging AI-assisted development tools to accelerate implementation.

Frontend Engineer — Lapang Data

Feb 2025 – Jul 2025 · Bekasi, West Java, Indonesia

- Owned frontend architecture for scalable web applications built on **Next.js 14 and TypeScript**, translating Figma designs into pixel-perfect, accessible, production-ready UI.
- Designed and built a library of modular, reusable React/Next.js components adopted across multiple feature teams, reducing duplicate implementation effort.
- Implemented end-to-end features using the App Router with client component architecture, balancing performance and maintainability tradeoffs.
- Partnered with designers, product managers, and engineers in an Agile/Scrum workflow, running code reviews to enforce type-safe, maintainable standards.

Frontend Engineer — Paper.id

Apr 2022 – Jan 2024 · Jakarta, Indonesia

- Re-architected the KYC and core dashboard workflows, redesigning existing features and introducing maintainability-focused patterns adopted across the codebase, leveraging AI-assisted development tools to accelerate delivery and reduce recurring maintenance issues.
- Led A/B testing initiatives to validate user behavior hypotheses, directly informing product decisions on UX and feature direction, leveraging AI-assisted analysis tools to speed up interpretation of test results.
- Collaborated cross-functionally with Product Managers and Product Designers to ship and iterate on customer-facing features.

Frontend Developer — PT Bank Mandiri (Persero) Tbk.

Sep 2020 – Apr 2022 · Jakarta Selatan, Indonesia

- Built and maintained customer digital onboarding and account-opening applications (**join.bankmandiri.co.id**, **kopra.co.id**) using TypeScript, Angular, and Bootstrap, supporting secure, scalable banking workflows at national scale.
- Engineered WebRTC-based video call integration (Avaya & Cisco) for real-time customer identity verification, replacing manual verification steps in the onboarding flow.
- Implemented pixel-perfect, responsive UI aligned to design systems, ensuring UX consistency across onboarding products.
- Diagnosed and resolved frontend performance and stability issues, improving reliability of customer-facing onboarding flows.
- Worked in an agile environment alongside engineers, analysts, and product owners to consistently deliver features on schedule.

Frontend Ionic Developer — PT. Fammi Indonesia Edutech

Apr 2021 – May 2021 · Bandung, West Java, Indonesia

- Converted Figma designs into Ionic implementation for the **InternetBaik** application, ensuring stable Android performance.

Frontend Web Developer — PT. Katalis Indonesia Santosa

Jul 2020 – Sep 2020 · Semarang, Central Java, Indonesia

- Defined structure and design for web pages and built a reusable component library for a web-based attendance application.

Full Stack Web Developer — it-mudah.com

Aug 2019 – Sep 2020 · Medan, North Sumatra, Indonesia

- Built and maintained RESTful APIs (CodeIgniter 3) and frontend applications (Angular 8+) for multiple client CMS products, including education-sector attendance systems (North Sumatra Government), hotel voucher systems, rental platforms, and e-commerce CMS for regional retail clients.
- Built real-time applications using Firebase Realtime Database with Angular 8+.

Additional Experience — Mentoring & Instruction

- **Education Mentor**, Binus Center Medan (Sep 2025 – Nov 2025) — Mastering Frontend with React.js; Web Development Masterclass.
- **Education Mentor**, Alterra Academy (Aug 2022 – Oct 2022) — Top-Tier Fullstack Academy (TFA) x SOFCO.
- **Computer Instructor**, Binus Center Medan (Oct 2018 – Dec 2019) — Taught HTML/CSS, SQL Server, VB.NET, and Office fundamentals.
- **IT Support**, Hosana Group / Kito (Apr 2018 – Jul 2018) — Hardware maintenance, network/CCTV installation, daily backups.

Education

STMIK–STIE Mikroskil, Medan — B.S., Computer Science (Teknik Informatika) · 2013 – 2017 Thesis: *Password Security Using Elliptic Curve Digital Signature Algorithm (ECDSA) and LSB Range of Byte Steganography with Pyramid Structure*

Certifications
